Epson SureColor **SC-S30600**

Screen or commercial printers, signmakers, digital copy shops and photo labs can expand their service portfolios with the Epson SureColor SC-S30600.

Designed to give the lowest total cost of ownership, the SC-S30600 can produce everything from posters, signs, banners, backlit panels and POS to vehicle wraps, interior decorations and exhibition displays. Users can reliably and cost-effectively print on vinyl, canvas, clear film, photographic paper and a range of popular banner substrates, at up to 64-inches (162.6cm) size.

Thanks to a jack at the rear, loading a new roll is a one-person job, and media tensioning can be controlled easily from front or back of the printer, speeding set-up and maximising productivity.

High workloads are accommodated with ease thanks to Epson-engineered performance, reliability and ergonomic printing. The SC-S30600 prints at speeds from 7.3m^2/hour up to 29.4m^2/hour (depending on mode).

The new UltraChrome GS2 ink for the SC-S30600 builds on the strengths of UltraChrome GS (used in the Epson Stylus Pro GS6000) with a new yellow formulation. UltraChrome GS2 is odourless, nickel-free and requires no special ventilation, allowing the SC-S30600 to be used in an office environment.

The power-efficient SC-S30600 is ENERGY STAR-qualified, saving money and impact on the environment.

KEY FEATURES

- Prints on a wide range of coated and non-coated media up to 64 inches (162.6cm) wide
- Single-operator roll media loading via easy-to-operate jack system
- Easily-accessible front and rear media tensioning control
- Speeds of up to 29.4m^2/hr (Draft mode; 10m^2/hr in Production mode; 7.3m^2/hr in Quality mode, all on vinyl)
- Epson's proven Thin Film Piezo printhead for precise droplet formation and long production life
- Enhanced ink requires no ventilation and is suitable for use in an office environment
